

Engineering and Architectural Solutions

Pjsi consultant Sdn Bhd. is a consultant structured to provide a comprehensive and quality range of professional services. Pjsi has successfully undertaken numerous public and private sector projects with international standard of expertise in the planning and design of building and infrastructure projects.

The various professional disciplines are seamlessly integrated at Pjsi to provide a high quality service in, building design, and master planning, urban design, infrastructure design, transportation and highway design, marine structure design, drainage and water resources design, and geotechnical design.

We are able to offer fully integrated professional design service with CAD prototyping and modeling for the entire design profession and from contractors' fabricated design drawings through to the last detail of product design.

The Directors of the company have extensive international and local expertise in many Architectural and Engineering project types.
